

	<b>READING</b>	<b>WRITING</b>	<b>MATHS</b>	<b>INQUIRY/OTHER</b>
<b>DAY 1</b>	Look for an informational text in your home that has a preface. What is the purpose of a preface? What type of information does it give the reader? How would the text change if the preface was removed?	If you could switch places with anyone in the world, just for tomorrow, who would it be and why?	Look at a grocery store advertisement or app. With a budget of \$125, plan out a week's worth of meals for yourself. How much of the budget did you spend? How much money do you have left?	Create a colouring page that contains a word explaining the emotion you are feeling today. Fill each letter of the word with different geometric shapes or patterns. When you are finished, colour it in.
<b>DAY 2</b>	Read a picture book. While reading, pay close attention to the setting of the story. In your journal, rewrite the story using a different setting. How did the setting change the story?	Research the physical properties of Saturn and Venus. Design a new planet that has properties of both planets. How big is it? Where in the solar system is it located? Be sure to give it a name and present it to your family.	Draw a bird's-eye view of your backyard. With a measuring tape and an adult's help, measure the perimeter of your backyard. Calculate the area. Can you calculate the area that is just grass?	Start at one end of your home. Walk heel-to-toe to the other end while touching your nose. Breathe slowly and calmly. See if you can take at least 3 minutes to complete this activity.
<b>DAY 3</b>	Find an article in a magazine or newspaper. Find the main idea of the text by only looking at the text features. Then, read the article to see if you were right.	Find an advertisement in a magazine or newspaper. What persuasive language did they use to influence the reader? Create an advertisement of your own for your favourite cereal. Be sure to keep your target audience in mind.	Plan a trip to another country. Create an itinerary and a budget. Be sure to include airfare, hotel, food and entertainment into your budget.	Stand up. Bend down and touch your toes, or as far as you can stretch. As slowly as possible, stand up straight. As you stand up, imagine each vertebra in your spine slowly stacking on top of each other.
<b>DAY 4</b>	Read a new picture book. When you reach the middle of the book, stop reading. In your journal, write the second half of the story. Finish reading the picture book. How close were you to the actual ending?	Create a comic strip showing a day in the life of someone learning at home. What does a typical day look like? Remember to include speech and thought bubbles for your characters.	Vowels are worth \$50 and consonants are worth \$40. Can you make a word that is worth \$280? How about \$620? How much is your name worth?	Sit in your backyard. Close your eyes and listen. What sounds can you hear? Sit still and continue to listen for at least 5 minutes. After, create a mind map including all the words that come to mind.
<b>DAY 5</b>	Choose a character from a video game or TV show. Create a social media profile for them. What would their profile picture be? What type of information and pictures would they share?	What is your favourite dinner food? Write a procedural text explaining how to make it. Remember to include a list of ingredients, clear steps and a conclusion. Be as creative and descriptive as you can.	Keep a time log of everything you do for one day. Determine what fraction of the day you spend sleeping, eating, watching TV, etc. Be sure they are in lowest terms. Then, change them to decimals and percentages.	Write a song or rap to describe what it is like learning at home. Be sure to add in as many descriptive adjectives as you can.
